## AMENDMENTS TO THE SOLICITATION

The following information is provided regarding the processing of ILM04.1 pre-award data through the PC-CCS software. Please note the following:

The PC-CCS software expects the data file name as specified in the Page H-9 Section 8.2 of the ILM040 SOW. This section states "The format for the File Name(s) must be XXXXXX.I01 to XXXXXX.I99. Where XXXXXX is the SDG identifier. I designates inorganics, and 01 through 99 the file name.

Since the SDG sample numbers for current SOW starts with an "M", the PC-CCS software expects to see a file name that starts with an "M" and is six digits long (including the "M").

Therefore, in order to process the pre-award data through PC-CCS software, a laboratory will need to rename the file to meet the above specification (six digits long, starting with "M"). Following this step the data can be loaded and processed through PC-CCS software.

The initial assessment portion of the PC-CCS will generate two errors stating the following:

Defect No.	Record Number	Defect Statement
2003		EPA sample number is missing/invalid
2008		SDG number is missing/invalid

These defects are generated since the sample numbers provided to and used by the laboratory are different from EPA sample number format identified in Exhibit B of ILM04.0 SOW

The Record Number is the checksum number reported at the end of an Agency Standard Record Type. By performing a search on the number, the laboratory should be able to identify the Record Type where the defect is originated. If defect 2003 is associated with a filed sample (not in EPA sample number format) the laboratory can ignore this defect. The laboratory should correct the electronic file appropriately if defect 2003 is associated with other types of samples.

Laboratories should investigate and correct all other Initial Assessment defects.

If the Initial Assessment defects identified by PC-CCS software are only associated with the invalid SDG and EPA field number, then the laboratory has the option of by-passing the Initial Assessment section and proceed to the technical part.
